

## **Mt. Evans 2015 Ranatra Fusca Recipients**

### **Erie High School – Pandora's Box Division III**

This team displayed an impressive presentation of the problem, Pandora's Box, in their set, cooperation as a team, and in their abstract interpretation of the video game. The performance demonstrated a great deal of fluidity and teamwork. The script was witty, polished, timed well, and entertaining for all ages. It is evident that a great deal of time, creativity and cooperation went into the set. Their use of aluminum cans, ice cream tubs, the transparency of the sheet, and overall construction created a convincing video game console display that enabled the imagination of the viewers. Their use of shadows and light on the transparent sheet allowed for a very dynamic, vivid, unique and abstract presentation. The judges agree that this far exceeded our expectations and challenged us to think about this problem in a whole new way (being narrow-minded was the evil and being open-minded was the destination/Odyssey of the Mind).
